Pic 2. When “**Score Obtained**” is selected from menu.

# Sync Data:

When **Sync Data** is selected. The data gets synced to server

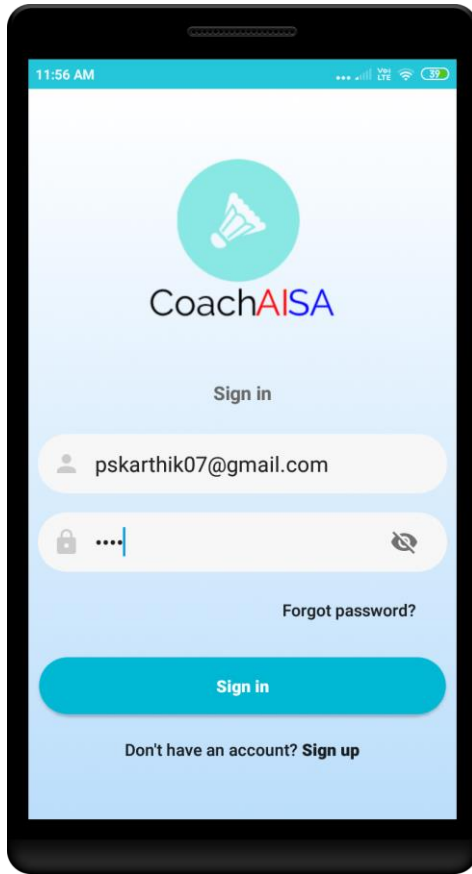

When **Play Game** selected from the menu.

**Play Game** module for android OS version below 6 doesn't play the video since the media player is not supported and for the version above 6 and below 8 plays the video fine but after resuming the video starts playing from beginning. Works totally fine for version above 7.
